

PAVEL VLASIKHIN

Self-Employed Software Development Service Provider

Email: pavel@vlasikhin.com

PROFESSIONAL SUMMARY

Independent IT service provider specializing in backend software development and system integration. Registered as an Individual Entrepreneur in Georgia (Activity Code 62090) with Small Business Status since June 2022. Delivering remote software development, maintenance, and technical support services to international B2B clients in the EU and USA under individual service agreements. Over 10 years of experience in web technologies with a strong focus on the Ruby on Rails ecosystem, enhanced with modern AI-assisted development workflows.

SERVICES PROVIDED

- Backend software development and architecture (Ruby, Ruby on Rails, Go)
- System integration, API development, and third-party service connectivity
- Database design, optimization, and data pipeline engineering
- Code review, quality assurance, and technical troubleshooting
- Infrastructure support: containerization, CI/CD configuration, deployment automation
- AI-assisted development and automation using Claude Code and LLM-based agents
- Technical consultation on software architecture and technology stack decisions

B2B SERVICE HISTORY

Independent Contractor — Backend Development Services

International IT Clients (USA, Europe) | October 2019 — Present

- Backend development, system integration, and web scraping services under B2B agreements with international clients
- Feature development, system maintenance, API integrations, and data processing delivered on a project basis
- Independent project timelines with milestone-based delivery; fully remote and location-independent
- AI-assisted development workflows (Claude Code, LLM agents) integrated into daily practice to accelerate delivery

Software Development Services (prior engagements)

Various IT Clients | 2016 — 2019

- Backend development for media streaming and crypto-trading platforms
- Web application development, API integration, and data processing solutions
- Cross-functional collaboration using Agile/Scrum methodologies
